

Anti hypoxia with Tasly Cerebral Granules

Lack of oxygen is a kind of hidden health killer. Long-term anoxic environment can lead to body organs lack of oxygen and thus affect the operation of important organs such as heart, brain, the human body health is affected, may even cause a variety of chronic diseases.

- **Affect the central nervous system:** dizziness, headache, listless, unresponsive, fatigue weakness, lethargy and other symptoms
- **Affect the respiratory system:** a chest discomfort, dyspnea, throat itching and symptoms such as cough
- **Affect the circulation system:** symptoms such as palpitations, heartbeat to speed up or slow down
- **Affect the digestive system:** loss of appetite, bloating, constipation and other symptoms

Tasly Cerebral Granules: promoting blood circulation, remove blood stasis, expansion of blood vessels, inhibit platelet aggregation, reduce blood viscosity, increase oxygen to brain function also effectively improve the brain blood flow velocity and microcirculation, improve the ability of the brain hypoxia, is effective in treating headache dizziness, tinnitus, dizzy, insomnia, sleep quality, memory loss and other disease.
